WESTHAUSER NURSERIES

Quality Plants Northern Grown

SAWYER, MICHIGAN

SEEING is BELIEVING

Customers who have visited our fields of Heavy-Rooted New Land Plants declare they are the finest they have seen anywhere. We know that if you look them over in person there would be no question in your mind about placing your order with Westhauser. Read what Mr. Lawson has to say about our plants in the letter below.

**BOUGHT 5000
PLANTS LAST
SPRING —
WANTS 20,000
NEXT YEAR**

Ohio, Oct. 21, 1934.
Mr. Wm. Westhauser.
Sir: We were sorry not to see you in person when at Sawyer, some weeks ago. We visited other Nurseries on our way to yours, but easily decided that the best prospects for STRONG, HEALTHY STRAWBERRY PLANTS for next spring planting were found in your fields. The 5,000 plants from you last spring are now a beautiful fruiting lot, and in spite of the fact that one week ago, ice froze here more than 1/4-inch thick and two freezes since, we are still picking large ripe berries at 25c a quart. Our Mastodon Everbearers from your nursery simply will not quit bearing. We are now preparing 2 1/2 acres for next spring setting, and will certainly be back to you for plants.
L. S. LAWSON.

Millions of High Quality New Land Strawberry plants are shown in the above photo, taken September, 1934. The plants shown at the left were dug from this field and photograph taken October 6, 1934. We call your particular attention to the big, long roots and strong crowns. This means plants that will take hold as soon as planted and give you a vigorous fruiting row and heavy fruiting plants.

BUY WESTHAUSER'S NEW LAND PLANTS AND HAVE THE BEST

Many of our interested visitors ask how it is possible that, in spite of the worst drought in the history of this country, we have such a fine, thrifty lot of plants. The answer is this: They are grown on new land, full of humus and containing all the mineral elements that are necessary to produce hardy, healthy,

superior plants. This is what we offer you for planting this coming spring.

**See our discounts for early and large orders
on pages 7 and 31**

Our Broad GUARANTEE Protects You.

We guarantee that our plants are first class in every respect, free from disease, freshly dug, true-to-name and we hold ourselves ready upon proper proof to return your money or replace stock. We further guarantee that our plants will reach you in good growing condition.

Up-to-the-Minute Farming Machinery

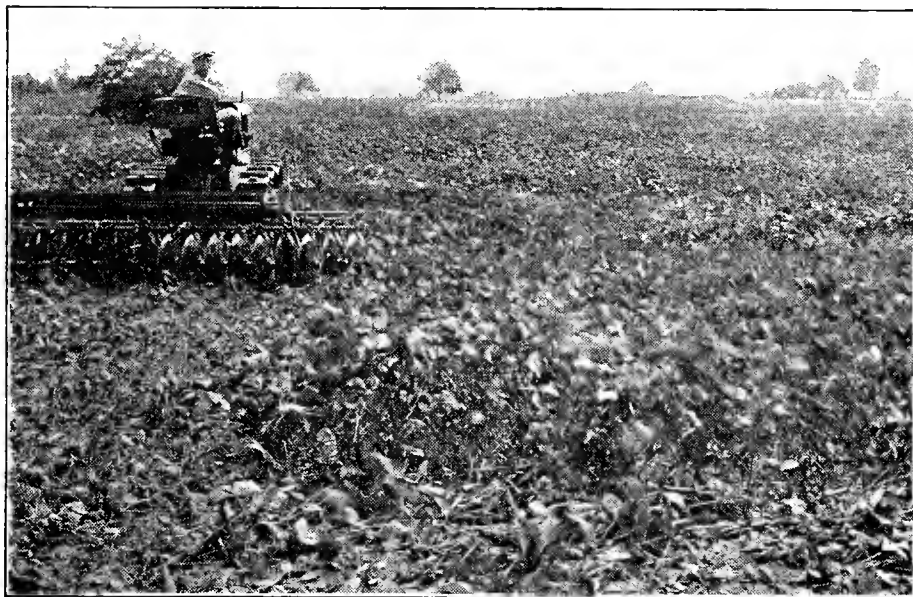

Have put us in a favorable position and have a strong bearing on quality and price. THE DEPRESSION has not hindered us in our ambition to improve our soils with cover crops, stable manure, etc., years in advance. On the contrary, we have made every effort to live up to our reputation to produce and offer only superior nursery stock, and believe that we have fully succeeded.

Ideal Climate

OUR NORTHERN CLIMATE is ideal for growing hardy nursery stock, because we are located so near Lake Michigan, which puts a damper on our winters, making the climate such that our nursery stock is practically dormant until late in the spring. Bear in mind, Mr. Fruit Grower, plants that are dormant so late in the season have little foliage and carry well in transit. That is one reason why our plants can be shipped long distances with the best of results.

Westhauser's Up-to-date Packing House and Office.

Discing Under a Cover Crop of Soy Beans to Add Nitrogen and Humus to Our Soil.

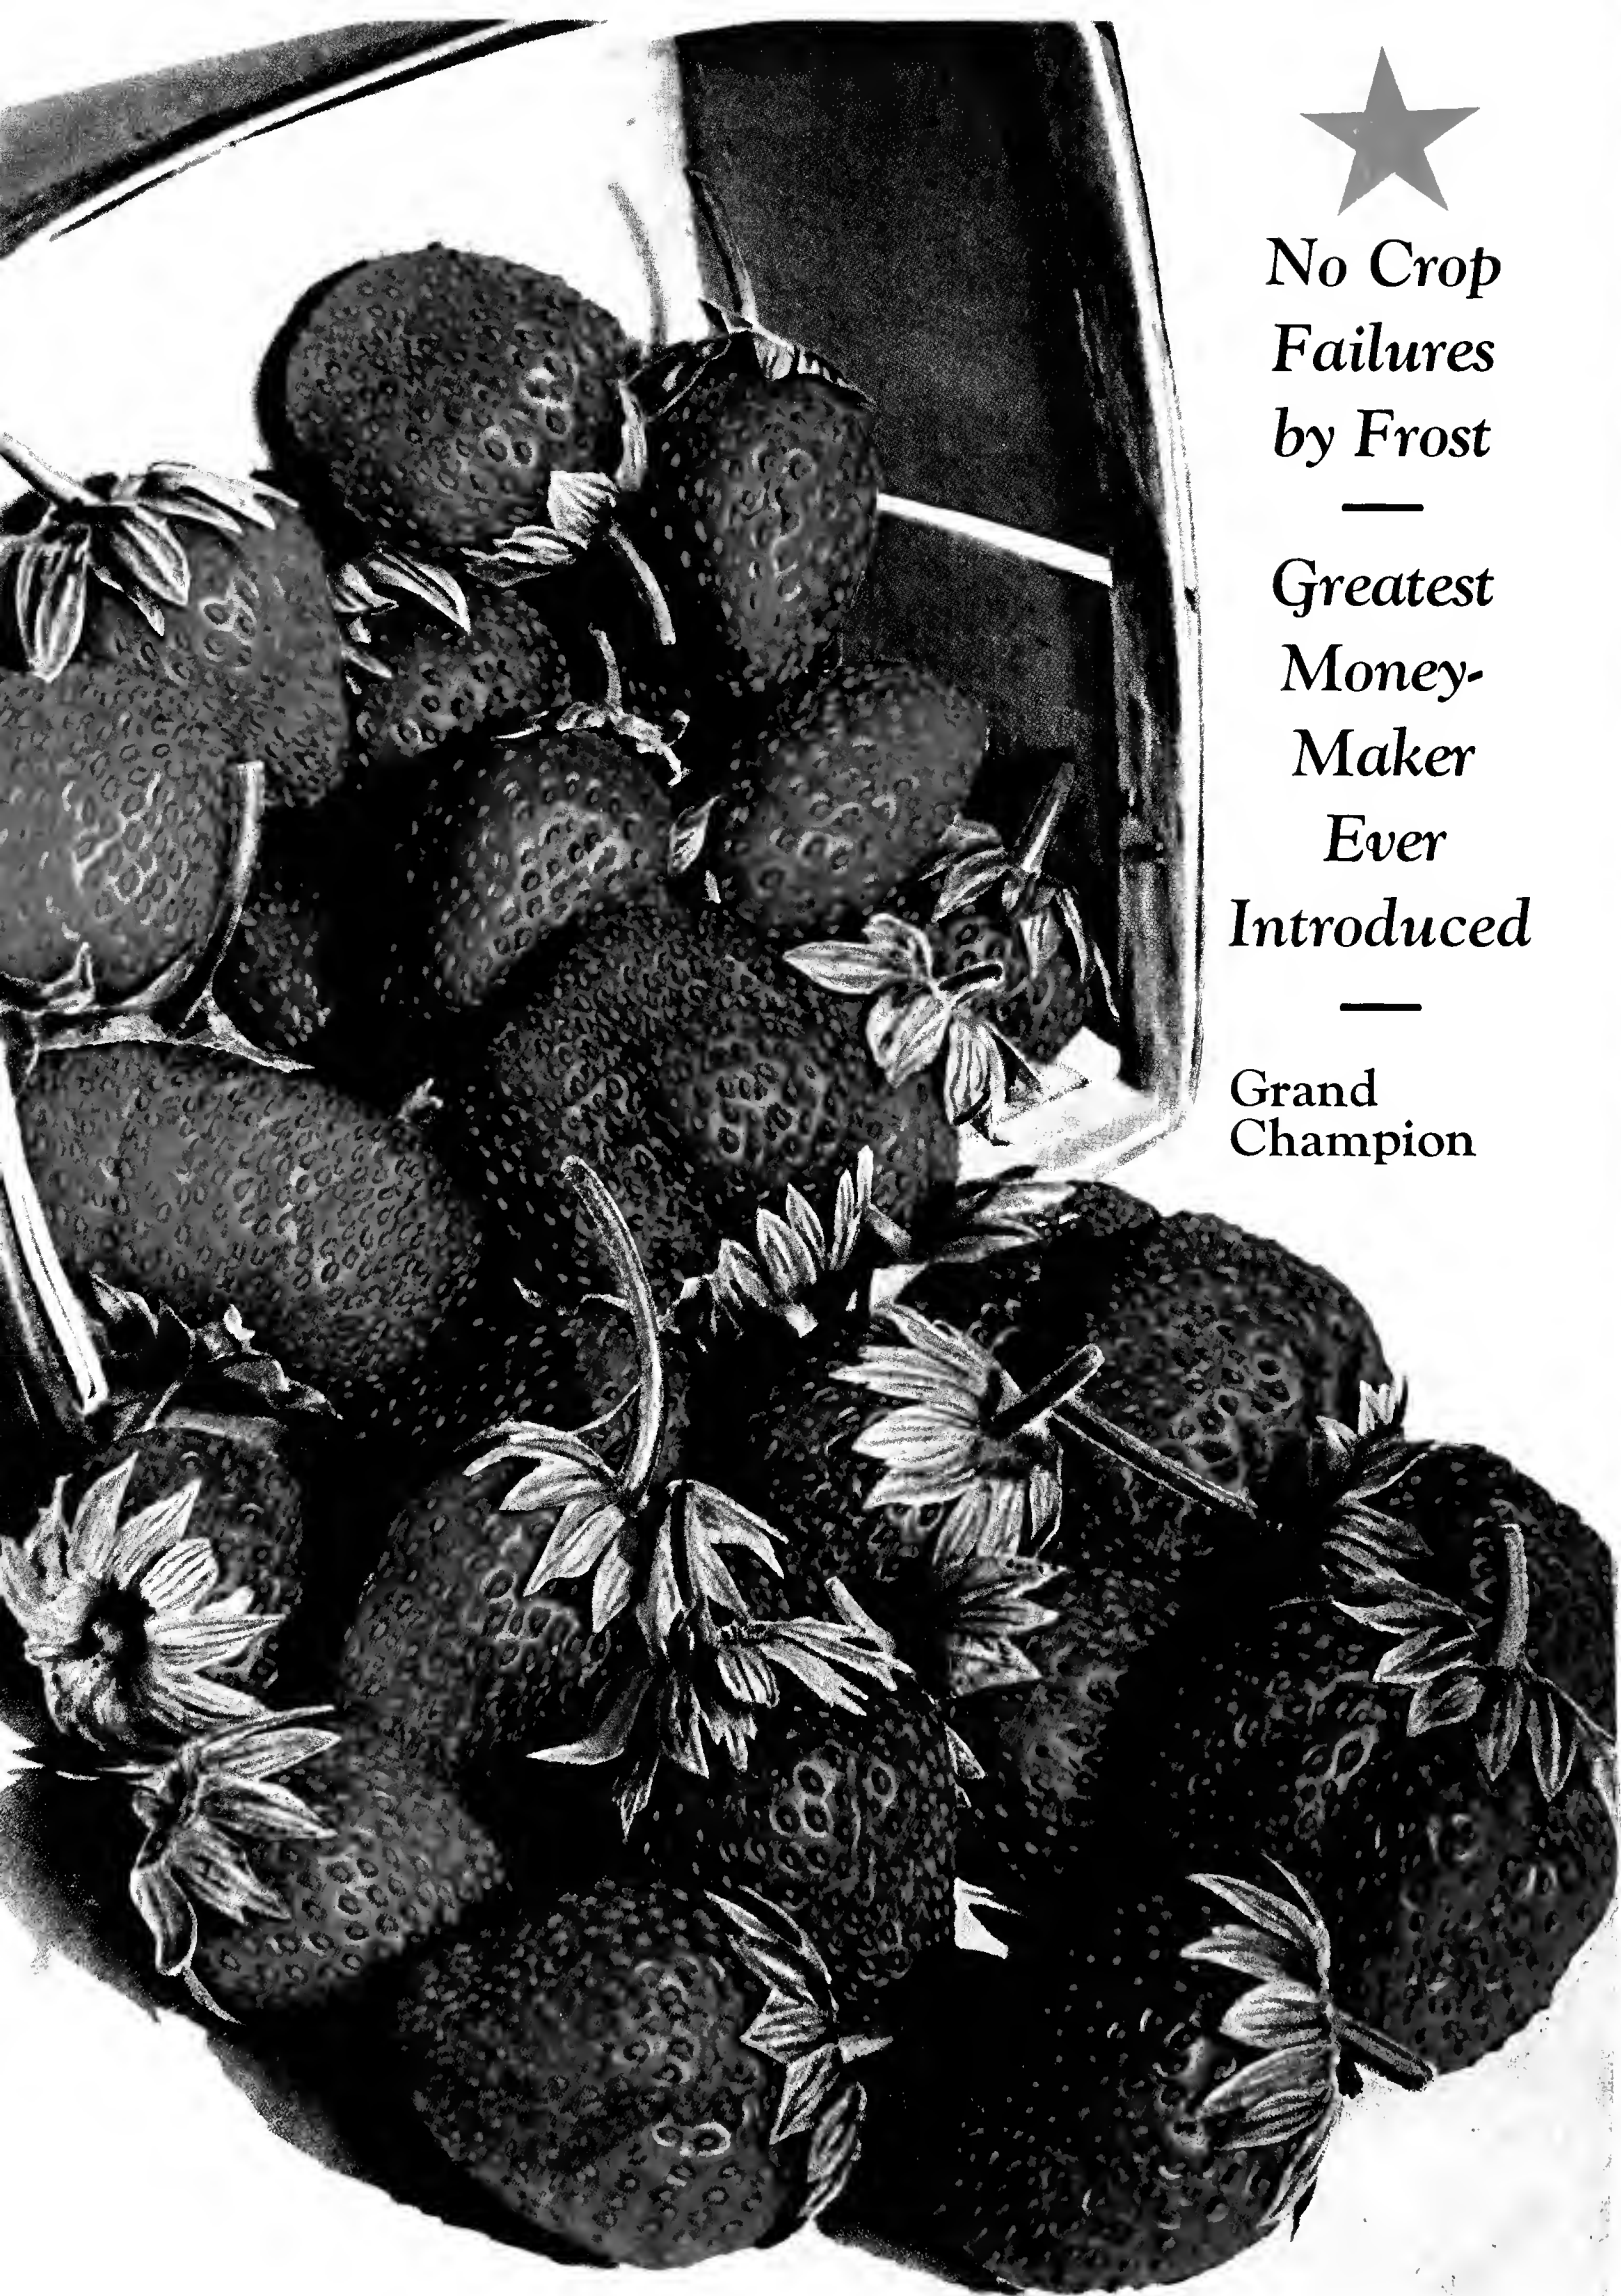

We Raise the Fertility of Our Soil with Carloads of Manure Every Year to Give You Sturdier Plants.

Beware of Cheap Plants

By fly-by-night nurserymen who have little or no acreage of their own and offer their product at very low prices. They depend on any berry grower who is willing to dig some plants between his fruiting rows. Of course such plants are small and undeveloped and can be bought almost at any price. Result, quite often a bunch of half starved, mixed plants. You would not consider buying scrub livestock for breeding purposes. Why buy scrub nursery stock?

WE GUARANTEE SATISFACTION. Our old customers with their repeat orders are the backbone of our business, which has more than doubled in three years.

Westhauser's New GRAND CHAMPION

YOUR PLANTS ARE REALLY
IN A CLASS BY THEM-
SELVES, Says Mr. D. C.
Franks of Ohio.

Ohio
Oct. 30, 1933

Westhauser Nurseries,
Sawyer, Mich.
Gentlemen:

You certainly use the right "slogan"
when you say GROWERS OF IMPROVED QUALITY
PLANTS.

In spite of planting a month late
last spring on account of weather condi-
tions, without rainfall for three weeks
after planting and unfavorable weather
conditions practically during the entire
growing season, the strawberry plants I
bought of you have made a wonderful
growth; wide rows of sturdy, healthy
plants.

Only your system of selecting strong
healthy plants, planted on new or heavily
fertilized land could produce such won-
derful plants as you have shipped me.

There is no comparison with plants I
have had from other nurseries, your
plants are really in a CLASS by them-
selves.

D. C. FRANKS

History of Grand Champion As Received From the Man Who Discovered this Outstanding Variety

We found Grand Champion as a single seedling
growing on a decaying stump. This seedling produced
30 plants. The next spring we dug 300 plants for
replanting, and harvested 105 quarts of selected
berries on space 66 square feet.

Over 5000 Quarts on One-Half Acre

Two years later, in spite of heavy frosts while
they were in bloom and almost continuous rain dur-
ing harvest, we picked over 5000 quarts of ber-
ries from ONE-HALF ACRE.

No Crop Failures on Account of Spring Frosts

The plants are large, the foliage is heavy,
which protects the blooms in early spring
from freezing. This is not the only protec-
tion. It would not be saying too much if we
called Grand Champion the spring EVER-
BEARER, for we have picked Strawberries
for 40 days on account of its continual
blooming. Crop failure is almost impossible.
Grand Champion side by side with Aroma,
was LOADED with fruit, while Aroma had
a very light yield.

All Season Bearer

Ripening with Premier, bears during the entire Strawberry
season and still competes in quality with the Aroma, which is
a late berry and is grown here almost exclusively.

The Berries

For canning and preserving are in a class by themselves as
they are coreless and retain their shape and flavor in the can.
Their rich red color, the extra large size, beautiful appearance and high
quality attract the fancy berry buyer. We have received premium on our
Grand Crampion ever since we have grown them. For prices, see page
31.

Prices Reduced

Last year we were sold out long before the season was over, although
we have more plants this year, but for the fact that we have reduced the
price about 50%, we anticipate a very active demand. Play safe and
order early, thus having your plants reserved.

This is What a Fruit Buyer Has to Say About Grand Champion

Westhauser Nurseries, Sawyer, Mich.

Benton Harbor, Mich.,

Dear Sir:

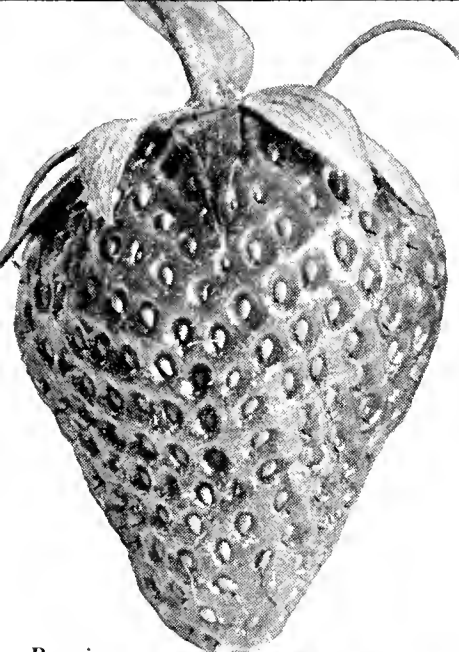

June 20, 1933.

I have your letter of recent date, in which you ask my opinion as
to the quality of the new Grand Champion. I bought this variety al-
most exclusively since they came in bearing from the originator, who
had about 25 to 30 cases a day. In loading carloads of Aroma Straw-
berries I have paid this grower a premium on Grand Champion. Of
course, I have received a fancy price for them on the Chicago mar-
ket on account of the large size and fancy appearance.

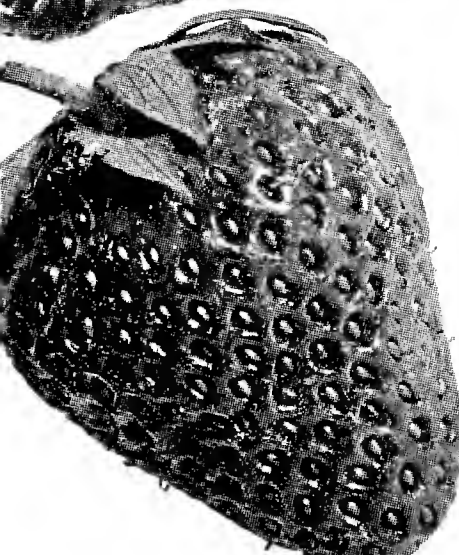

GUST BALDACCINI.

On this page we present to you a true picture of our heavy-rooted,
hardy northern grown, new land Grand Champion plants. These plants
were dug and this photograph taken October 26th, 1934. Just a sample
of the sturdy plants we have to offer our customers for 1935.

Premier.

WESTHAUSER'S FAMOUS PREMIER

Early—Fancy—Hardy—Profitable

Excellent for long distance shipping. Cannot be beat for

SIZE—BEAUTY—FLAVOR

THIS YEAR OF ALL YEARS when many acreages of plants all through the middle western states have suffered from the extreme drought during the growing season, we are happy to offer to our customers the best lot of Premiers we have ever grown.

BUY WESTHAUSER'S IMPROVED HEAVY-BEARING PREMIERS GROWN ON NEW LAND

Our plants are grown on **new land**, chuck full of plant food and humus, which holds the moisture, and this, together with constant cultivation and hoeing, kept our PREMIERS growing while other fields of plants were actually stunted.

These are only a few reasons why our PREMIERS are in a class by themselves. If you will turn to page 2 you will see a true photograph taken from a PREMIER field on one of our plant farms. This photograph was taken last October. Note the particularly fine, heavy foliage and many runners, indicating a thrifty root system, which guarantees you success in growing WESTHAUSER'S plants.

An Excellent Variety for the Home Garden or Commercial Planter

PREMIERS are in great demand. Buyers everywhere pay the highest prices for this early fancy berry. They ripen over a long period, the size of the berries holding up well until the end of the harvest season.

The Demand for PREMIER Plants is Enormous so Place Your Order Early

For Prices, See page 31.

Dunlap *The Old Standby*

(Midseason). The berries are medium to large, conical and often slightly necked, dark crimson with a deep red flesh, quality very good. The plants are healthy and vigorous. Very productive. Grows on all kinds of soil, and in extremely cold climates. The best variety for canning and a good pollenizer for pistillate varieties. It can be shipped to distant markets. Holds up a long while after being picked. Season a few days after Premier begins bearing. For prices, see page 31.

Dr. Burrill

The Million Dollar Strawberry

Resembles the Dunlap, ripens about one week later than Premier, is a strong plant maker on any kind of

soil and a heavy bearer. The berries are a handsome deep red color. It cannot be beat as a dry weather producer. It is a fine canner and shipper.

For Prices, See page 31.

FINER PLANTS THAN I EVER BOUGHT BEFORE

Ohio

Westhauser Nurseries,
Gentlemen:

Received the Premier berry plants, which I ordered from you, today, and they came in fine shape in every way. I have been in the berry business for 20 years and have bought plants from a number of nurseries in that time, and will say these are finer plants than I ever bought.

S. W. BONE

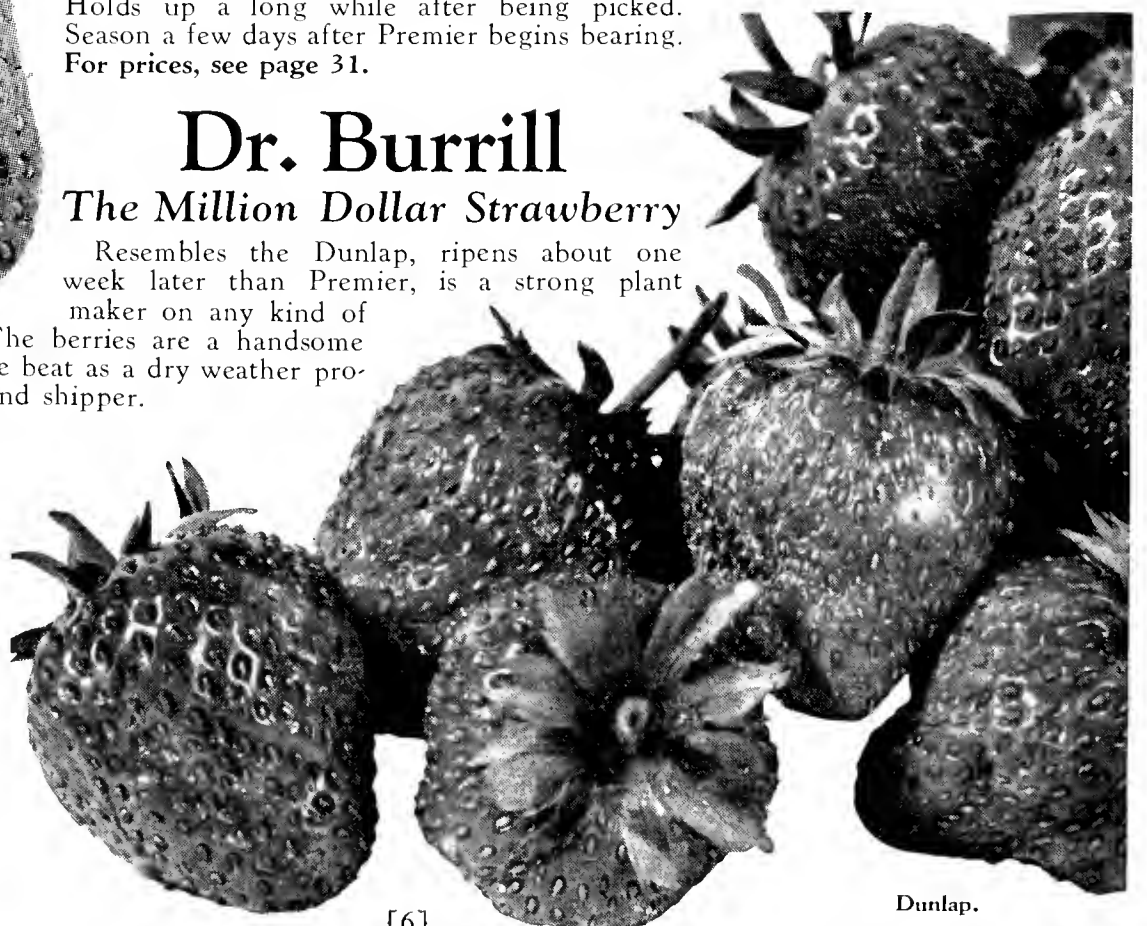

Minn.

Westhauser Nurseries.

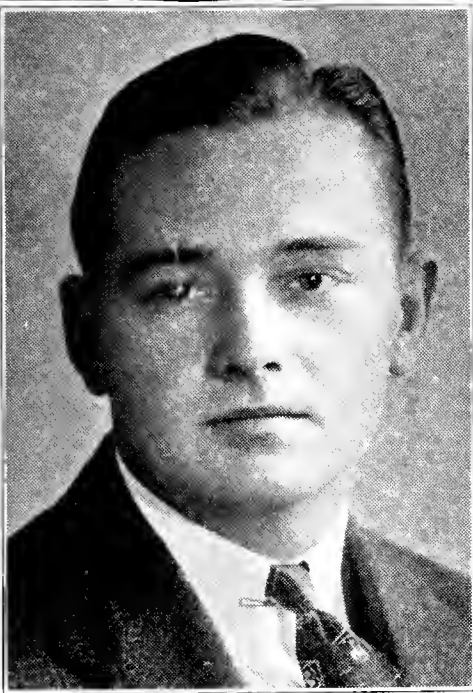

Dear Friends:

Enclosed money order for Senator Dunlap plants. The plants I got of you 2 years ago; Say, they were real plants—I had some of another nursery that year also, but your plants brought the results. I shall always think of Westhauser first if I need more Strawberry plants.

Yours very truly,
LOUIS F. TRAPP

Dunlap.

HOW TO ORDER *and* TERMS *Read Carefully!*

WHEN TO ORDER. Order now on the receipt of this Catalog or as soon as possible thereafter and we will reserve your stock for you. Orders are booked in the order they are received and we ship as near the date requested as possible according to weather conditions. Shipping date March 15 to the latter part of May.

HOW TO ORDER. An Order Blank is provided for your convenience on page 30. Fill out clearly, be sure to print or write your name and address plainly, thus avoiding errors and delay. Remit by cash, money order or check. If cash is remitted be sure and register letter.

PAYMENT AND TERMS. Cash with order; however, if your order amounts to \$5.00 or more, we will book your order with 25% down and balance 10 days before you wish your stock shipped.

HOW TO SHIP. Small orders can be shipped by parcel post for quick transportation. However, larger orders, trees and shrubs, will be to your advantage if sent express. Very large orders can be shipped by freight during the early season from March to April 15th.

IN CASE OF SHORTAGE, ERROR, OR DAMAGE. We are always glad to rectify any mistakes we have made, and wish you to advise us of any shortage, damage, or error in your shipment. All such complaints will be promptly taken care of, but must be made at once, upon arrival of stock, or not later than 10 days thereafter; after which we will not be responsible. If the packages arrive in damaged condition, send us the express receipt with agent's notation, showing extent of damage. In case of shortage we will promptly send you the number of plants you were short.

NON-WARRANTY. If any nursery stock sold by us should prove untrue to name, we hereby agree, on proper proof of such untruthness to name to replace such stock as originally ordered or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty or understanding, express or implied.

REFERENCES. Dun & Bradstreet; Postmaster, Sawyer, Mich.; Benton Harbor State Bank, Benton Harbor, Mich.

HOW TO PREPARE THE SOIL. The depth of plowing or spading should be 6 to 8 inches. Then the soil should be well pulverized and leveled up smoothly. We recommend fall plowing; this gives the soil time to settle and the vegetation has time to decay. If the soil is not too soddy, spring plowing is successful. After the

ground is plowed it can be leveled off with a roller or cultipacker. In other words, well drained soil which will grow such crops as corn will grow strawberry and raspberry plants successfully.

HOW TO PLANT STRAWBERRIES. For commercial planting we recommend that rows be about 3 feet 8 inches apart and plants set about 14-18 inches in the row, requiring about 8500 plants per acre. Holes for setting plants may be made with a dibble, trowel or an ordinary spade. Do not plow furrows and put plants in them, as that leaves the ground too loose for good results. For garden culture the rows may be made closer and for hill culture the plants may be planted about 24 inches apart each way.

PLANTS REQUIRED TO SET AN ACRE

	Plants
Strawberries (commercial use) 3 ft. 8 in. x 1½ ft.	7,920
Strawberries, Everbearing 2½ ft. x 1½ ft.	11,600
Strawberries (garden use) 2½ ft. x 1½ ft.	11,600
Black Raspberries 7½ ft. x 3½ ft.	1,777
Red Raspberries 6 ft. x 3 ft.	2,420
Blackberries 7 ft. x 3½ ft.	1,777
Dewberries 6 ft. x 3 ft.	2,400
Currants 5 ft. x 4 ft.	2,200
Gooseberries 5 ft. x 4 ft.	2,200
Grapes 8 ft. x 10 ft.	540
Grapes 8 ft. x 12 ft.	440

SPACING DISTANCE FOR FRUIT TREES

Apple 30 to 40 feet apart each way
Peach 16 to 20 feet apart each way
Sour Cherry 16 to 24 feet apart each way
Sweet Cherry 20 to 30 feet apart each way
Pear 18 to 24 feet apart each way
Plum 18 to 24 feet apart each way
Apricot 18 to 24 feet apart each way

REMOVAL OF FLOWER STEMS. Soon after the plants are set in the field, flower stems are usually produced. These should be removed as they appear, preferably before the blossoms open.

The production of flowers and fruit at this time will decrease the vigor of the plants, and the production of runners.

With fall bearing varieties the blossoms are removed until about July 1st, after which time the plants are allowed to fruit. Cultivate frequently to destroy weeds, and conserve the moisture, and you will be assured of a good crop, for Westhauser plants are healthy, strong and ready to produce fruit for you.

Surplus Strawberry Plants at \$3.50 per 1,000

During our digging season every spring, at the end of each day, there are a few plants of all varieties left. We never carry plants over from one day to another, so that these plants are classed as surplus plants. We offer them to you who do not care to have named varieties, at \$3.50 per 1000. We will not label these plants as to variety, simply calling them surplus plants. They are first class plants, fresh dug, and will bear you a fine crop. **Do not write asking for named varieties**, for if you want named sorts, labeled, they must be bought at catalog prices. These plants will not be sold in less than 1000 lots. Simply send in your order saying Surplus Plants, and how many you want.

6640 Quarts per Acre
Most productive of all Strawberries. Produced 6,640 quarts per acre on test plots. Large, bright red berries. Premier under similar conditions produced 4,520 quarts

DORSETT

NEW INTRODUCTION OF THE DEPARTMENT OF AGRICULTURE. A cross of Royal Sovereign and Premier (or Howard 17). Propagated by the U. S. Department of Agriculture and released three years ago for the first time.

An eastern nurseryman introduced this two years ago, and has this to say about it: "We so thoroughly believe in its possibilities that we would not even set Premier for fruiting if we had enough Dorsett plants available."

PRODUCTIVENESS. On a test plot Dorsett produced at the rate of 6,640 quarts per acre, while Premier produced 4,520 quarts.

FOLIAGE. It is vigorous and healthy, upstanding, and has a very thrifty appearance. Nurserymen who visited our plant farms last summer were amazed at the healthy, upstanding foliage which was noticeable from a distance. The plants are large and compare with the Mastodon Everbearer plants. We are growing both Fairfax and Dorsett on new land, which accounts to a great extent for the extra large size of these plants.

SIZE OF BERRIES. The berries are considerably larger than those of Premier; color very desirable light red; beautiful in appearance, light red color and dark green cap; large size and attractive shape; will appeal to any buyer in the market for fancy berries.

FROST PROOF. This variety is too new to have definitely established itself as frost proof, but in the few years it has been grown there has been little frost damage.

One of the largest berry growers in the East, who has grown extensively Blakemore, Bellmar, Premier, and other leading kinds, and also tested the Dorsett, says that he considers the Dorsett the most valuable variety he has grown, and if he were limited to one sort he would choose Dorsett.

PRICES REDUCED. We were compelled to return money on many hundred orders last year, being sold out the latter part of the season. While we have a larger acreage of Dorsetts, we have our price substantially reduced. Do not be disappointed, order early and have your plants reserved. For prices, see page 31.

On this page we present to you a true picture of our heavy-rooted, hardy, northern grown, new land Dorsett plants. These were dug and this photograph was taken October 26, 1934. Just a sample of the sturdy plants we have to offer our customers for 1935.

NEW DORSETT—
 most productive
 of the new varieties.

★ FAIRFAX

New berry of outstanding quality
—more productive than Premier and
finer berries. Introduced by the U. S.
Dept. of Agriculture. Released
for the
first time
3 years
ago.

In a test plot Fairfax pro-
duced at the rate of 5,110
quarts per acre, while Premier
under similar conditions pro-
duced 4,520 quarts.

On this page we present to you a true picture of our heavy rooted, hardy northern grown, new land Fairfax plants. These plants were dug and this photograph was taken October 26, 1934. Just a sample of the sturdy plants we have to offer our customers for 1935.

Fairfax is a cross of Royal Sovereign and Premier (or Howard 17). The most outstanding characteristic of the Fairfax is its quality. It also compares favorably in other ways with the best of other spring bearing varieties.

SIZE OF BERRIES. Berries of Fairfax average very large, even slightly larger than Dorsett, larger than Premier and Blakemore under similar conditions.

FROST RESISTANT. Although Fairfax has been fruited for a number of years and it begins blooming early no frost damage has been noted during that period.

PRODUCTIVENESS. In a test plot Fairfax produced at the rate of 5,110 quarts per acre, while Premier under similar conditions produced 4,520 quarts; but we want to bring out the fact very strongly that not only the amount per acre is in favor of Fairfax, but also the percentage of fancy berries.

VIGOR, HEALTH AND FOLIAGE. To produce a satisfactory crop of berries, a variety must have a healthy foliage. In that respect Fairfax is outstanding, having a thrifty, healthy, upstanding dark green foliage.

COLOR, APPEARANCE AND QUALITY. The berries are bright red with yellow seeds, very attractive. No berry (except Dorsett) can equal Fairfax in quality. It is impossible to describe it; to be appreciated it must be eaten. By all means test this wonderful new variety in your locality and reap the profit. Be the first to supply your neighborhood with this winner.

PRICES REDUCED. We were compelled to return money on many hundreds of orders last year, being sold out the latter part of the season. While we have a larger acreage of Fairfax, we have our prices substantially reduced. Do not be disappointed. Order early and have your plants reserved. For prices, see page 31.

TOPNOTCHERS

Blakemore

Early.

Blakemore is a free plant maker and produces a heavy fruiting row on any kind of soil. The foliage is tall and heavy and pro-

protects the blooms from late spring freezes. The berries are beautiful, glossy, bright red to the core. It has a tough skin, firm flesh and a wonderful mild and juicy flavor.

An excellent canner and one of the few varieties that keeps its color after preserving.

We have fruited them for the past four years and find they ripen a few days earlier than Premier, keeping their fancy appearance to the last picking and yielding at the rate of 400 16-quart crates to the acre. For test purposes we have left part of a row unpicked for a week in very hot weather and found that very few berries were over-ripe or unfit for shipment at the end of the week. This shows the firmness of this variety and is of particular interest to the commercial grower who often finds weather conditions which prevent regular picking of berries.

The Blakemore is without doubt the most fancy appearing berry ever introduced. In southern states many growers are now using Blakemore to the exclusion of all other varieties.

After fruiting this variety in 1930 we realized that we had one of the most valuable varieties of the whole Strawberry family and we prepared at once for a larger acreage. For prices, see page 31.

Blakemore.

Pearl

Very late.

The latest of the spring-bearing Strawberries. It is practically frost-proof, as it has a heavy foliage that protects the blossoms from the cold. The berries are dark red to the heart, the skin rather tough, which makes it a good shipper, and the prominent yellow seeds give it a pleasing appearance. Supply your market with fancy berries and get top prices when all other varieties are gone. Be sure to include some of these in your order—the Strawberry family is not complete without this variety. Prolong your season and make more profit. For prices, see page 31.

A PERFECT STAND

Wis.

You will be glad to know that the 7,000 Strawberry plants, and the 1,000 Raspberries, arrived in excellent shape. You would be pleased to look over our fields now and see the splendid stand. Not more than 100 of the Strawberry plants failed to grow, so you see we are well pleased.

W. S. W.

BEST PLANTS I EVER RECEIVED, SAYS M. G. CARTIER

My Strawberry plants arrived today and I am very much pleased with them. They are the best plants I ever received from any nursery and I was born and brought up in the Strawberry business, having had as many as 10 acres at a time. I wish to thank you for the best service also.

M. G. C.—Mass.

Pearl.

Big Joe Crampton

Midseason to late.

size and productiveness. One of Chicago's leading hotels sends their buyer to our locality every year and they choose Big Joe for their daily supply. The color is medium red, very glossy and has a really fancy appearance. The first berries come in a double shape. The stems grow high and keep the fruit off the ground. It is a good plant maker. If you are looking for a productive medium late variety, plant Big Joe. For prices, see page 31.

Big Joe.

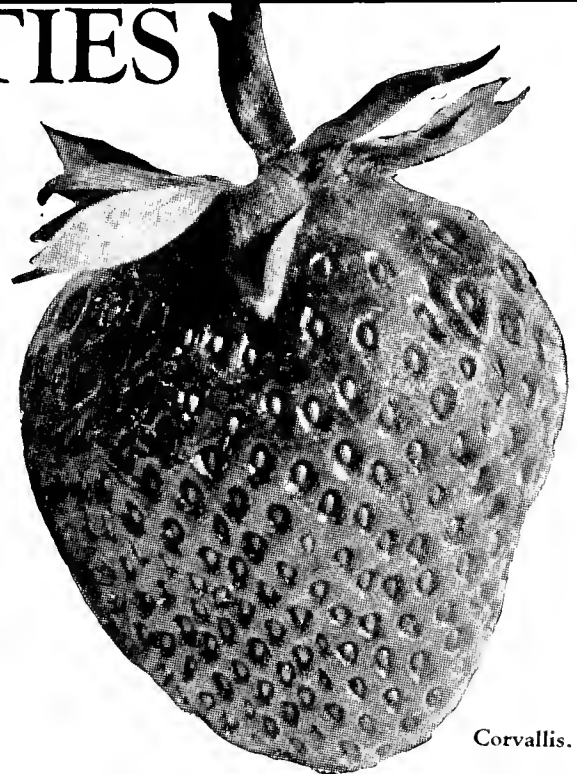

of the NEWER VARIETIES

Corvallis

Very late.

plant grows to a large size and stands well above the ground. The foliage is of a light green and in comparison the Corvallis is somewhat like the Aroma with large yellow seeds. Try some in your locality. For prices, see page 31.

This variety was introduced in the state of Oregon and is grown so far mostly in the Western states. In the past year we have tested this variety and find that it has proven to be a late producer. The

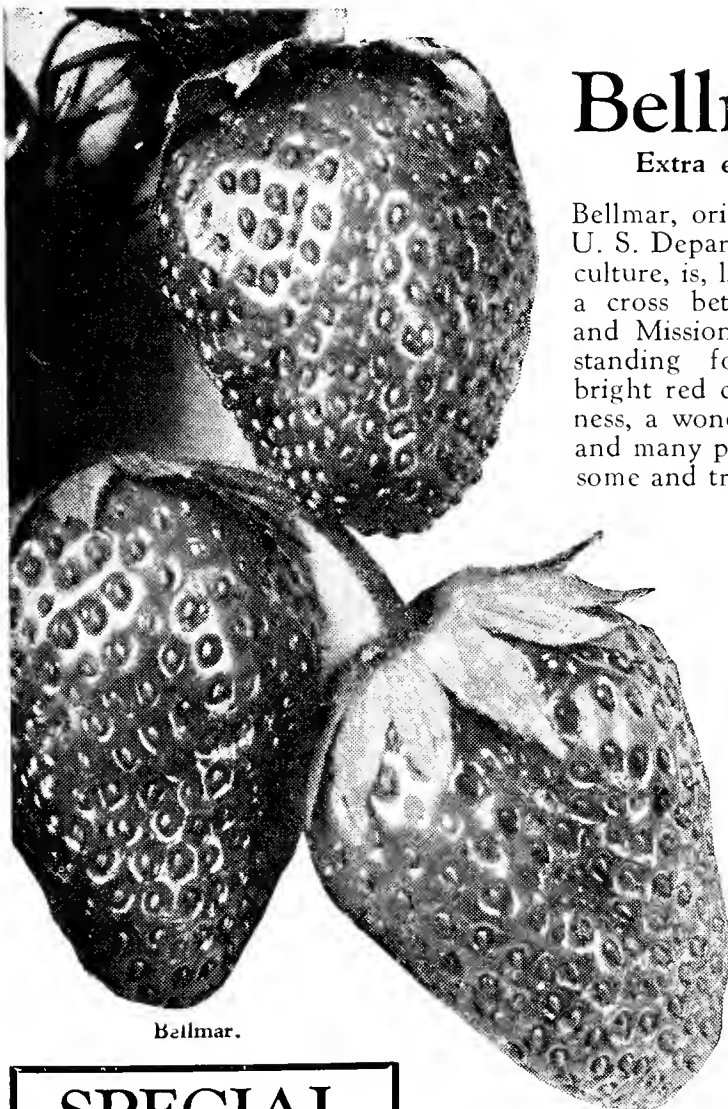

Corvallis.

Bellmar

Extra early.

Bellmar, originated by the U. S. Department of Agriculture, is, like Blakemore, a cross between Premier and Missionary. It is outstanding for its glossy, bright red color and firmness, a wonderful shipper and canner. Bellmar makes a thrifty growth and many plants. We have a limited amount of this new variety. Order some and try them out in your locality. For prices see page 31.

Bellmar.

Two Old Reliables

Gibson

Midseason.

The Gibson has been a favorite with the commercial grower everywhere for the past twenty years, and is grown in our Michigan Small Fruit Belt to a great extent.

Extra heavy bearer and plant maker. We have never known this variety to fail to produce a heavy crop.

The berries are dark red, firm and hold their size to the last berry. Flavor is neither sweet nor sour, but just right for canning. We know of no other variety which bears more quarts of berries to the acre than the Gibson. If you grow berries for the market include this variety in your order.

A Gibson patch lasts for years if kept free from weeds. For prices, see page 31.

Aroma

Late.

The well known berry that has been on the market for many years. Berries are a glossy red, and have a very pleasing flavor. It is one of the best berries grown for long distance shipping as well as being a home favorite. A trial will be sure to make friends and bring repeated orders.

For prices, see page 31.

What Westhauser's Selected Everbearers Will Do in

Four
Months
After
Plant-
ing

Photo Taken June 1st.

Photo Taken October 1st, Four Months Later.

MASTODON Everbearer

Much has been said about Original Strain Mastodon Plants. Our foundation stock was purchased direct from the originator, Mr. Voer, but now Westhauser's Improved Strain Mastodon Everbearer stands supreme. They have been carefully selected, only the strongest plants are planted year after year.

Grown on New Land

The past few years our plants have been grown on New Land. Result: Plants with extra large root system and crowns. Any practical farmer or gardener can appreciate the high quality product of this mode of culture.

Get Started Right with a Heavy Fruiting Strain

Since the vigor and energy of a plant is stored in the roots and crown, and since these plants have been improved each year by careful selection, such as we practice, you can readily appreciate that you get the best at no extra cost if you order your Mastodon plants from us. We sincerely believe that you cannot buy better plants no matter under what trade name advertised or price you pay, and we are willing to stake our reputation on the above statement.

3 Full Crops in Eighteen Months

When planted this spring, this wonderful variety will produce a crop in July and continue bearing until late in the fall. This year we had the first killing freeze November 5th. At that time our Mastodon were loaded with berries and blossoms. The second spring the plants begin to fruit with the June varieties and continue on during the season.

The large size, fine quality and delicious flavor make the Mastodon a marvel of Nature. No wonder the demand for plants has increased from year to year. The demand for Mastodon exceeds the supply every year. Avoid disappointment by ordering early. Your plants will be reserved and shipped to you at the proper planting time. For prices, see page 31.

68,000 MASTODON EVERBEARING Strawberry Plants to One Co-Operative Buying Club

Mr. L. S. Lawson, of Ohio, Writes: Bought 5000 Plants, Wants 20,000 Next Spring, Gets 25c Quart, After Frost—Still Picking

Mr. Wm. Westhauser, Payne, Ohio.
Dear Sir:

We were sorry not to see you when at Sawyer some weeks ago.

We visited other nurseries on our trip to yours, but easily decided that the best prospects for strong, healthy strawberry plants for next spring planting were found in your fields.

The 5000 plants from you last spring are now a beautiful fruiting lot, and in spite of the fact that one week ago ice froze here more than one-fourth of an inch thick, and two freezes since, we are still picking large, ripe berries that sell at 25c per quart.

Our Mastodon Everbearers from your nursery simply will not quit bearing.

We are now preparing two and one-half acres for next spring planting and certainly will be back to you for plants.

L. S. LAWSON

Mr. Harris Picked 700 Quarts of Berries from 1000 Westhauser Mastodon First Year Westhauser Nurseries, Nevis, Minn.

Dear Sirs:

We would like to have you send us your new catalog.

We raised some very fine berries from the Mastodon plants we bought of you last spring. 700 quarts from the 1000 plants. We will set out more this spring.

H. W. HARRIS

Who tried several nurseries with orders for comparison. After the first shipment they selected Westhauser Nurseries to fill the balance of 68,000 plants.

Strong-rooted
New Land
Mastodon Plant.

Champion Everbearing

An improved Progressive that is raised extensively in some sections of the country. While the berries are not quite as large as the Mastodon it has a very good flavor and produces a good crop year after year. For prices, see page 31.

WAYZATA, New Everbearer

This variety was introduced in Iowa. A true test shows that the WAYZATA produces twice as many berries as the Mastodon and ripens evenly. The flavor is outstanding and the berry is larger than the Mastodon. There is only one drawback and that is the WAYZATA does not produce many plants with its heavy production of berries. It is a fact that it will take a long time before there will be enough plants to supply the demand, thus the price will be high for years to come. Try a few and get started this year. Prices, page 31.

Westhauser's Bearing - Age Cane Plants

You Gain a Year

and you can enjoy a crop of wonderful berries a few months after planting. But it is not the only advantage over one-year plants; you also will have with most varieties a full fruiting row the second year.

For Quick Results and Profit

plant WESTHAUSER'S 2-Year Raspberry and Blackberry Transplants.

Here is what Mr. W. J. Benschlein of Detroit, Mich., has to also say about Westhauser's transplants:

"I want to tell you about the Latham transplants I bought of you. I set out 500 plants in March and in July I sold enough of these wonderful berries to pay for more than double the cost of the plants. I never heard of such a remarkable record for the first year. Next spring I will set out five acres; can you supply me with plants? I am more than satisfied and thank you for your co-operation."

Westhauser's CERTIFIED BLACKBERRIES

Eldorado

The choice of the canner and housewife for those good old-fashioned jams, pies, preserves and fresh fruit for the table, coming just after the raspberry season when but little other fruit is available, so people are glad to pay well for it. The canes grow sturdy and upright, and are hardy enough to need no winter protection. The berries are large, uniform in size, jet black, and do not turn red after being picked. They have a flavor that always calls for more and are firm enough to ship to distant markets, assuring good prices. Its hardiness and freedom from disease, especially orange rust, the common enemy of all Blackberries, has brought it into favor with the grower. For prices, see page 31.

ELDORADO T-ROOT PLANTS are sucker plants or shoots which spring up from the roots of the mother plants.

ELDORADO ROOT CUTTING PLANTS are individual plants; that is, part of the roots of the old plants are cut off and planted in spring. They produce a nice fibrous root system and a good top growth, therefore they will get a quicker start than the T-roots when planted. We are listing them only a little higher than the T-roots or sucker plants and they are well worth the difference.

ELDORADO ROOT CUTTING TRANS-PLANTS. If you want a crop of Blackberries this year, our transplanted root cutting plants will do it. They are sturdy and have a fine root system. They have been reset in nursery rows for two years, and will bear fruit a few months after planting. Of this variety, we have only a limited amount, so order now and play safe. For prices, see page 14.

Westhauser's Blackberry plants are certified disease-free, having been twice State Inspected during the growing season.

Alfred

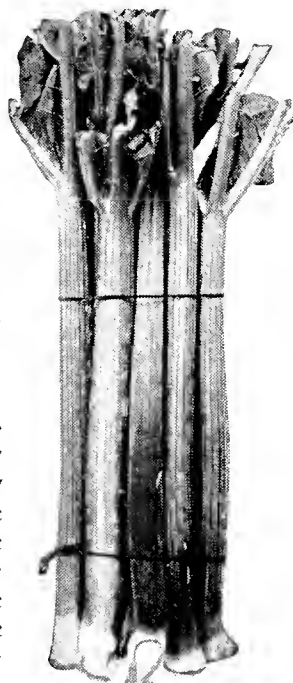

The coreless Blackberry, originated in Michigan, the state that produces fruit with the flavor. The color is a glossy jet black, the flavor sweet and delicious, and it is nearly seedless and coreless. A hardy plant that produces mammoth berries, often one and three-fourths inches long. It does equally well in cold sections. Why not include a few in your order and get started raising this profitable berry? For prices, see page 31.

Asparagus

MARTHA WASHINGTON. This new rust-resisting variety is the result of fourteen years experimenting by the United States Bureau of Plant Industry, and as we believe this to be the best, we, like other nurserymen, have discarded all other kinds. The stalks are large and tender, and very productive. One of the most delicious and earliest vegetables grown, develops quickly and is profitable for market or for home use. With but very little care a patch will last for many years. For prices, see page 31.

SUGGESTIONS FOR RAISING ASPARAGUS

Any well drained part of your garden or field is good for Asparagus. For the garden it can be planted about 18 inches apart each way, but for field culture rows 4 feet apart and plants 2 feet apart in the rows is best. Make a trench 10 inches deep, put in about 2 inches of well-rotted stable manure and cover with earth. Place the crowns in this trench, and spread out the roots and cover with a thin layer of soil. When they start growing, work the soil around them until the trench is full. The stalks should not be cut the first year, but the patch kept free of weeds. With Westhauser Asparagus Roots you will be assured a good crop the second year.

Rhubarb.

Rhubarb

VICTORIA. Rhubarb should be grown in every garden; it provides material for early spring pies and delicious sauce. It is also valuable for canning. Plant a few roots this spring and you will have a supply of early fruit next year. This wonderful new variety is different from the old sorts. The stems are very large and tender; yields very heavily. 1-yr. roots, 10c each; 6 for 40c; 12 for 50c; 25 for \$1.00; 100 for \$3.00; 1000 for \$18.00.

Horseradish

HORSERADISH ROOTS do best in rich, loose soil, set slanting and covered two inches. Crowns, each 10c; 4 for 25c.

Horseradish.

Asparagus.

★ GEM A Wonderful New Everbearer ~

COMMISSION HOUSE FINDS GEM BEST SELLER

Chicago, Ill., Nov. 17, 1934.

Westhauser Nurseries,
Sawyer, Mich.
Att. Mr. Westhauser.

Dear Sir:

We want to thank you for the regular shipments of Mastodon and Gem Everbearing Strawberries we received from you the past few months.

Your berries have always sold readily on account of their large size, and we have regular customers waiting for them.

As you will note on your Sales Returns, we were able to get you a premium for the New Gem, which shows up better than any other Everbearing Strawberry on account of its bright, glossy color and its uniform size.

Thanking you for the business you have given us, we are

Yours very truly,

THE SHAFTON CO.
By J. W. Shafton.

Westhauser's Gems are grown on new land with all its plant food and mineral elements untouched, therefore, they are **outstanding for vigor and health**, have extra heavy fibrous root system, in fact, their roots are nearly twice the size of ordinary plants.

After fruiting this great **Everbearer** the second season we can say that **Gem** is all our last year's description claims and more as far as shipping quality and appearance is concerned.

We make almost daily shipments of Everbearing Strawberries during the fruiting season from July to November and it is a fact that **Gem** brought continually premium prices over the other varieties.

In spring Gem bears as heavy as our best spring bearers and is outstanding for its fancy appearance. The plants can be had only from a few nurseries. Last year we were sold out before the shipping season was half over and we were compelled to return thousands of dollars on unfilled orders. Our prices have been reduced. So be wise, order as soon as possible, and have your plants reserved.

We bought our foundation stock last spring direct from the introducer, Mr. Frank Keplinger, a Central Michigan plant grower, who found this plant amidst his Progressive Everbearing patch. The berries on this particular plant were so outstanding for size, beauty, quality, and firmness that Mr. Keplinger realized he had a valuable addition to the

Everbearer family. For two years every plant of this variety was carefully guarded. Finally the secret became known and hundreds of offers were received from growers and nurserymen. However, not any of the plants were allowed to leave the place, until last spring. That is when we bought our supply, direct.

FOLIAGE. For an Everbearer GEM is a heavy plant-maker and produces a larger fruiting row than any other Everbearer we know of. The plants are very hardy, not subject to leaf blight.

SIZE AND APPEARANCE. The berries are large size, very uniform, and held their size even throughout the dry weather we had last summer. They have the appearance of an over-size Premier berry. The color is a deeper red, very glossy, and they have a very fancy appearance.

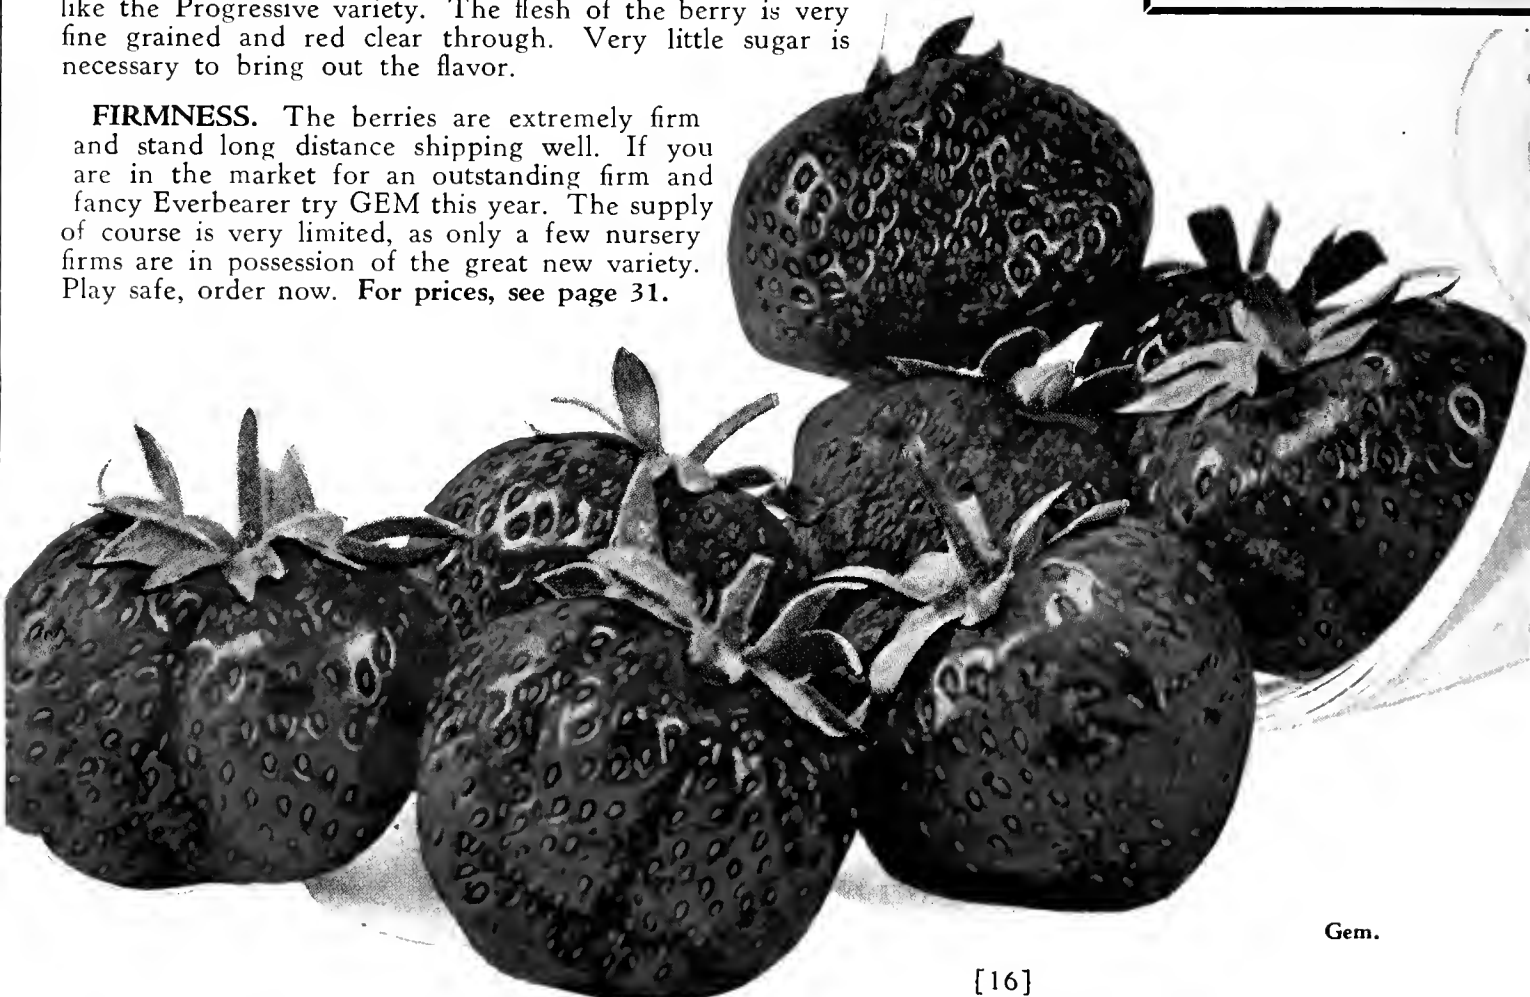

FLAVOR. The berries are very sweet and have a flavor like the Progressive variety. The flesh of the berry is very fine grained and red clear through. Very little sugar is necessary to bring out the flavor.

FIRMNESS. The berries are extremely firm and stand long distance shipping well. If you are in the market for an outstanding firm and fancy Everbearer try GEM this year. The supply of course is very limited, as only a few nursery firms are in possession of the great new variety. Play safe, order now. For prices, see page 31.

Westhauser's Certified Berry Plants

Lucretia

(The Creeping Blackberry).

Produced on a trailing vine instead of a bush, does best when supported on a wire like grapes; free from rust and all fungous diseases. The berries are even larger than blackberries. They are jet black, coreless, sweet and juicy, and ripen about ten days earlier than blackberries. The Lucretia so far surpasses all other kinds of Dewberries that we have discontinued raising other varieties. No home should be without a Dewberry patch. For prices, see page 31. For transplant prices, see page 14.

Westhauser's Berry Plants

Are certified disease-free, having been twice state inspected during the growing season.

Youngberry

This new berry is so much different from any berry that is grown in most parts of the country. It is a cross between the Loganberry and Dewberry. Color of fruit is a rich wine color. Size 1 to 1½ inches. Flavor is pleasant, sweet, with the tartness of the blackberry. Excellent for table use, canning, jellies, pies, and for wine. The plant is a rank grower. Withstands cold and heat. Adapted to a wide range of soils. A great producer. Try them in your locality. They will be the talk of your neighborhood. Plants are still scarce, and a little high in price. For prices, see page 31. For transplant prices, see page 14.

Lucretia.

Youngberry.

New Logan Black Raspberry. (Description on page 18).

For Bigger Crops and Larger Profits Buy

New Logan Blackcap

(Early, see color illustration on page 17).

The best dependable early black Raspberry grown. In some localities where it has been grown for the past few years it has almost displaced the other standard varieties.

Berries are as large as the Cumberland, bears as heavily and ripens a week ahead of Cumberland. This gives the grower a chance to make some real money. One of the New Logan's outstanding characteristics is its resistance to mosaic and other Raspberry diseases. We have a fine lot of thrifty plants to offer.

Prof. J. S. Shoemaker, of the Ohio Experiment Station, has this to say about the New Logan: "If the new Logan does as well elsewhere as it has on the plantation I visited, I would consider it to be the best black Raspberry introduced since the well known Cumberland. The new Logan seems to possess two outstanding characteristics in particular, both very important ones. First, it seems very highly resistant to virus diseases; second, it begins to ripen a week or so before Cumberland, this giving it a decided advantage for early market."

For prices, see page 31. Bearing size prices, page 14.

Westhauser's Raspberry Plants

Are certified
disease-free, hav-
ing been twice
state inspected
during the grow-
ing season.

Oregon

Gentlemen:

I am enclosing money order for an order. I sent you an order for some Black Raspberries last spring. They were the best rooted of any plants I ever bought and every plant lived. They are something to be proud of.

Yours truly,

MYRTLE E. PFEFFERLE

MICHIGAN STATE DEPARTMENT OF AGRICULTURE ORCHARD AND NURSERY INSPECTION

Certificate of Nursery Inspection
No. 968.

This is to certify that the raspberry fields of WESTHAUSER NURSERIES, Sawyer, have been inspected according to the regulations of this department and those listed on the back of this sheet have been found apparently free from dangerous insects and disease, this certificate is granted and the sale of plants from the approved fields is authorized for the year ending September 15, 1935.

SAMUEL T. METZGER,
Lansing, Mich., 9-1.
Commissioner.

First Inspection made 6-13-'34.

Second Inspection made 9-5-'34.

Bureau of Agricultural Industry,

Paul Van Deuse, Director.

E. C. Mandenberg,
In Charge of Orchard
and Nursery Inspection.

The New Thornless Youngberry Plant Patent No. 4

Something entirely new for the Blackberry-Dewberry family! This Youngberry is absolutely thornless. One can readily see how much easier it is to cultivate and prune the bushes, also to pick the fruit. Bushes can be handled with the naked hands with perfect safety. The bushes grow just like other Youngberry bushes, and are equally thrifty, healthy and hardy. Require no winter protection this far north.

The Thornless Youngberry produces berries just like those described on page 17, but tests have shown the Thornless variety to be 15% more productive. Protected by U. S. Plant Patent No. 4, against propagation by anyone but the owner. Supply limited, order early.

Prices: 1-year, No. 1 plants, 12 for \$2.00; 25 for \$3.50. 2-yr. transplants, 3 for \$1.55; 6 for \$2.65; 12 for \$5.00; 25 for \$7.50, all prepaid.

Westhauser Nurseries
Sawyer, Michigan

Westhauser's **LARGE ROOTED, HEAVY-BEARING STRAIN OF** Raspberries

Cumberland

The leader among all Black Raspberries. This is the most popular with growers, as it does well in any climate or any well drained soil. The large, rich, black berries present such an attractive appearance that buyers pay the top-notch prices for them. Excellent for table use and canning. The Cumberland sets so many berries that it is necessary to give them a severe trimming, as the plants could not hold up if all the berries came to mature size.

On the Benton Harbor market, the largest cash fruit market in the world, more Cumberland berries were bought than any other black Raspberry, a fitting testimonial to its high regard by the grower and consumer. In years past we have had to return many late orders with the disappointing words: "Sold out." Moral—Order Early. For prices, see page 31.

Black Raspberry Transplants

We have a limited amount of 2-year black Raspberry transplants to offer. They will bear fruit this year, and will more than pay for the extra cost. For prices, see page 14.

Westhauser Nurseries,

Adrian, Mo.

Dear Sirs: Regarding the 1100 Cumberlands I purchased from you will say that they are doing nicely. I pruned the transplants back quite a bit before setting and I believe I have established some sort of record when I tell you all 1100 are growing fine.

The ground these plants are set in is just ordinary garden soil. Am figuring on several acres for next year, and will probably want both some early and late varieties.

Yours truly,

Cumberland.

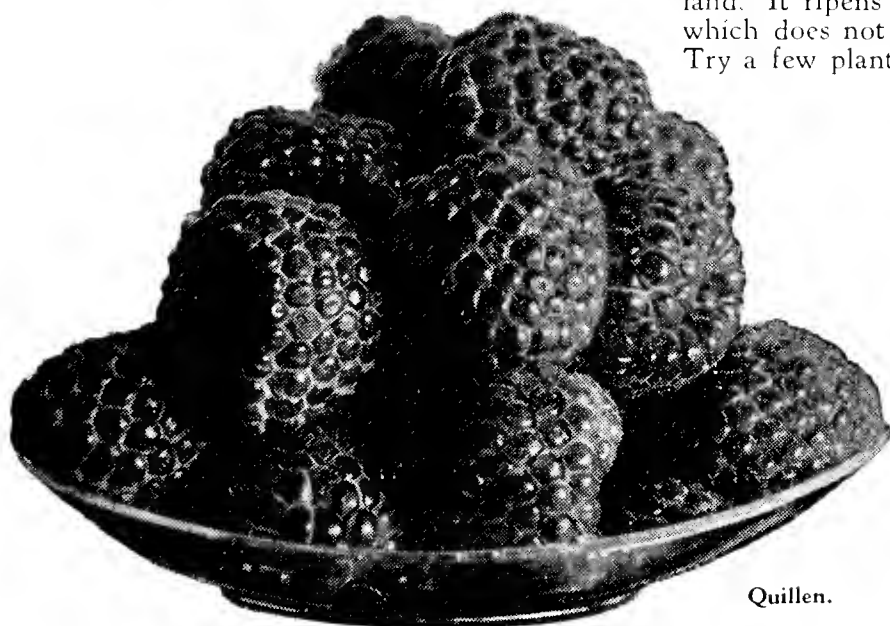

New Late Quillen

rich in flavor and is a fancy table berry. The plants are strong growers and highly resistant to diseases; also easy to grow. For prices, see page 31.

Prolong your black raspberry season and make money until the end. The NEW QUILLEN (LATE) is an extra large glossy appearing black raspberry of high quality. It is very

Black Beauty Raspberry

This Black Raspberry was originated in Ohio. The originator says they are more productive and harder than the Cumberland. It ripens with the Cumberland and is a large black berry which does not crumble. It is also apparently free from disease. Try a few plants. For prices, see page 31.

Quillen.

Westhauser's Heavy Producing Strain

Latham.

Latham

Originated in Minnesota where the severe winters are a test, but it does not winter-kill even at 45 degrees below zero. This is the largest, most beautiful and profitable red Raspberry grown. Rich, dark red berries an inch in diameter are quite common. They stick to the stem days after they are ripe when other varieties would soften and fall to the ground. The fruit is firm, making it good for canning and shipping, as well as for table use. A heavy bearer. Up to the introduction of the Chief in the red raspberry field, Latham was the Ace of all for quality, size, and also outyielded the older varieties by a great margin. In an actual official test the Latham outyielded the older varieties by over 3,000 pints per acre on a three-year planting. The fruit ripens about a week later than the Chief and often covers a fruiting season of about eight weeks. The demand for Latham always exceeds the supply—so order early.

See page 31 for prices. On 2-yr. transplants, see page 14.

Grades of Latham and Chief Raspberries

2-year-old Transplants. These will bear a light crop the first year set out and will almost make a full fruiting row for the next year. For prices, see page 14.

1-year Bearing Size. These have 2-year roots and 1-year top growth, having been pruned to the ground after the first year. Of course they are not as heavy as transplants, but will bear some fruit this year. Besides, they will make a heavy fruiting row for the coming year.

1-year No. 1 Fancy. These are extra heavy-rooted and the cream of our 1-year plants.

1-year Medium. Are smaller plants with a fair root system.

For prepaid prices, see page 31.

Early King

An early red Raspberry, one of the first on the market. The plants are very sturdy, and the berries are bright red and ripen evenly. It thrives equally well on heavy or light soil, is remarkably free from disease, and can be relied upon to produce a profitable crop each year. For transplants, see page 14.

Westhauser's Raspberry Plants

Are certified disease-free, having been twice state inspected during the growing season.

St. Regis

(Everbearing Red Raspberry).

When partaking of some choice, deliciously flavored fruit have you not often wished it would last longer? The St. Regis Everbearer is the answer, as it will produce during the regular fruiting season and until late in the fall. It resembles the Early King in flavor and appearance. If you do not have the land or time to grow St. Regis for market, be sure to secure a few bushes for home consumption. For transplants, see page 14.

Golden Queen Raspberry

The much sought-after golden yellow Raspberry as a novelty for home gardens, a delicacy for eating fresh from the bushes and for table use. The size and shape are very similar to the Cuthbert. The canes are hardy, sturdy, upright growing, almost thorn-free; the rich golden yellow berries are very attractive in appearance.

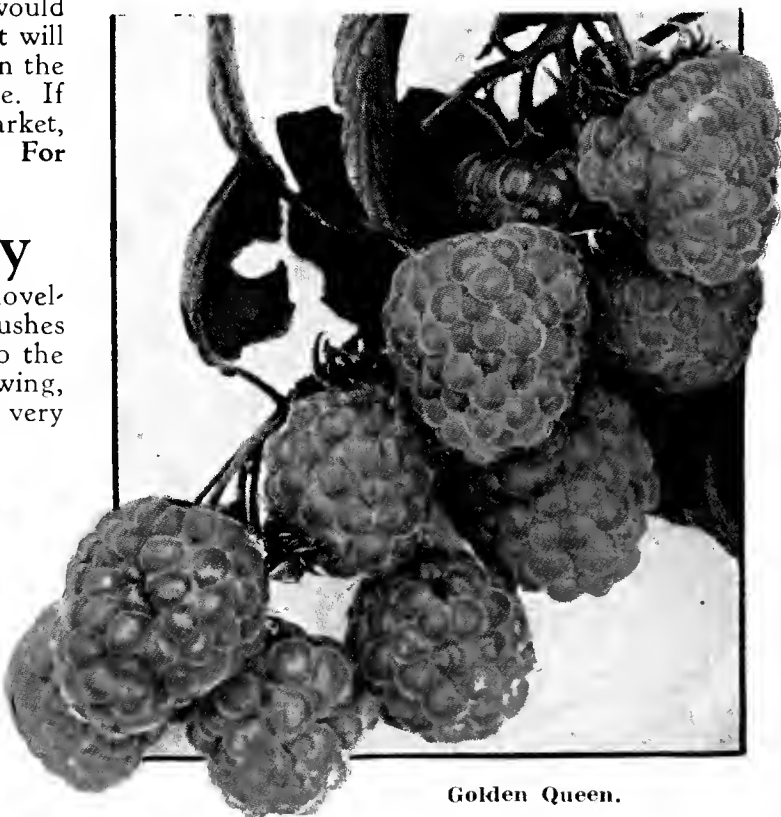

Price, 15c each; 6 for 75c; 12 for \$1.25; 25 for \$2.25.

Ideal Collection

50 Latham Red Raspberries

50 Cumberland Black Raspberries

SPECIAL PRICE \$2.00 Net Price.

Golden Queen.

Certified Red Raspberries

Chief Outyields Even the Heavy-Bearing Latham by 20%. Chief is an offspring of Latham but ripens a week to ten days earlier than its parent. It was introduced by the Minnesota State Breeding Farm. The berries are large and firm, do not crumble, are beautiful red and of finest quality. The bushes are hardy and disease resistant with heavy, dark green foliage.

Chief and Latham are two of the most profitable red Raspberries. Highest price for early red Raspberries, that's Chief. Latham to prolong your picking season by three weeks.

While we have a good supply, mechanically dug, extra heavy rooted plants, the demand for these varieties is enormous. Play safe, order early, and receive the benefit of our sharply reduced prices. For prices, see page 31.

Special for the Home Garden and Growers Who Want Quick Returns

We have a limited amount of two-year Latham and Chief transplants that come into bearing the first season, that would much more than pay for the extra cost. A bargain while they last. For prices, see page 14.

Newburgh.

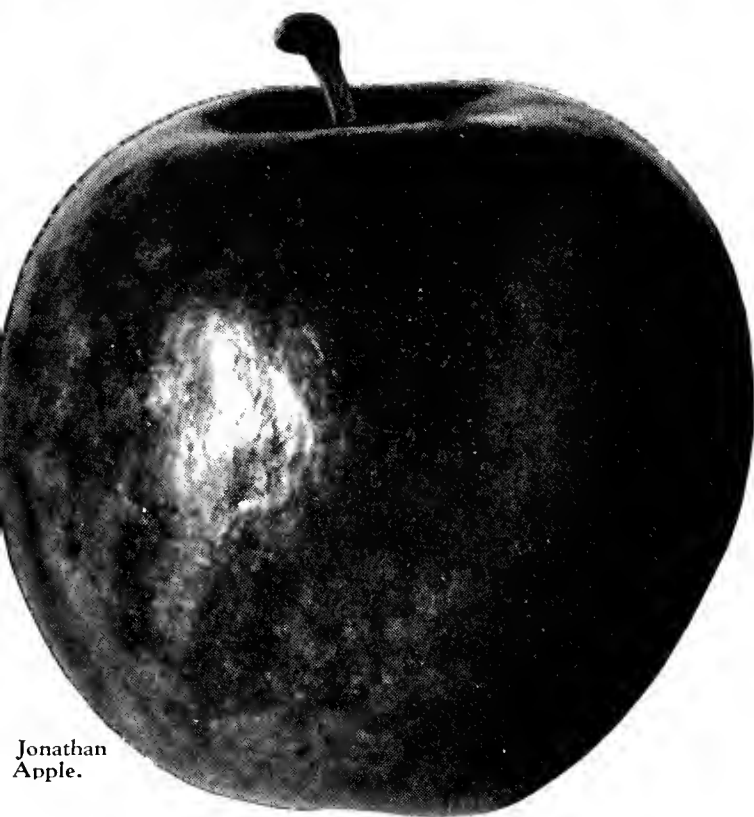

Newburgh And here is a new one—The NEWBURGH—introduced by the New York Experiment Station. We have fruited this variety this year and have found them to be a heavy bearer of large, rich red berries, even larger than Latham. The plants are very strong and stocky, and we now believe, as New York does, that we have a variety which will make good for the fruit grower in a commercial way.

AN IDEAL GARDEN VARIETY

On account of its rich, distinct Raspberry flavor, different from any other. They are so far mosaic immune and our plants are 100 per cent healthy.

We have paid a high price for our foundation stock and the supply of plants of this great new variety is limited. It is advisable to place your order early and have your plants reserved. For Prices, see Page 31; for bearing age size, see page 14.

Westhauser's Hardy Northern Apples

Jonathan Apple.

DUCHESS. (Early). Bright colored, delicious, very good to cook. A very profitable midsummer apple. It has proved to be one of the best varieties under cultivation in the Northwest. 2-yr., 40c each; 10 for \$3.25; 100 for \$30.00.

WEALTHY. (Early Fall). A favorite early fall apple; large, green, shaded to dark red; quality very good and tender. Tree is hardy and productive. 2-yr., 40c each; 10 for \$3.25; 100 for \$30.00.

McINTOSH. (Late Fall). Highest quality for home or market. Beautiful bright red with high, spicy flavor. 2-yr., 40c each; 10 for \$3.25; 100 for \$30.00.

DELICIOUS. (Winter). A large crimson-red Apple with fine grained flesh. Crisp, tender, juicy, sweet. Ideal dessert Apple. Heavy cropper and excellent keeper. 2-yr., 40c each; 10 for \$3.25; 100 for \$30.00.

JONATHAN. A beautiful, bright red Apple. Of excellent keeping quality. Fruit is highly flavored and brings a high price on the market. Flesh is tender, juicy and rich. Tree bears early and produces heavy crops for a long period of years. 2-yr., 40c each; 10 for \$3.25; 100 for \$30.00.

SNOW APPLE. Medium. Deep crimson; flesh white, very juicy and tender. 2-yr., 40c each; 10 for \$3.25; 100 for \$30.00.

DOUBLE RED DELICIOUS. This new Double Red Delicious colors about three weeks earlier than the Common Delicious. In August, when the regular Delicious are still green, Double Red Delicious are red all over and are ready to bring fancy prices. We have only a limited amount of these trees to offer. Order early and play safe. 2-yr., 50c each; 10 for \$4.50.

HYSLOP CRAB. Excellent for preserves and jellies. A heavy, regular producer. Fruit large, red, round and smooth; flesh yellow and sub-acid. 2-yr., 40c each; 10 for \$3.25; 100 for \$30.00.

Cherries

SOUR VARIETIES

RICHMORENCY. A cross between the Early Richmond and the Montmorency. Ripens a week to ten days before the Montmorency and has quality of the Montmorency and is fleshier. Larger than the early Richmond. 2-yr., 50c each; 10 for \$4.50.

LARGE MONTMORENCY. Best late sour Cherry, ripening about ten days later than Richmond. The fruit is extra large, bright red, firm and fine for shipping. A strong grower, perfectly hardy, bears young, and a full crop. 2-yr., 40c each; 10 for \$3.00; 100 for \$22.50.

SWEET VARIETIES

WINDSOR. A late sweet variety, valuable for market and desirable for home use. Fruit large, dark red. Flesh firm and sweet. Resists rot and clings to tree long. 2-yr., 60c each; 10 for \$5.00; 100 for \$40.00.

NAPOLEON. The finest sweet cherry. Sometimes called Royal Ann. A prolific cropper of extra large, fine quality fruit. A mighty fine variety for eating, canning, or market. 2-yr., 60c each; 10 for \$5.00; 100 for \$40.00.

Richmorency.

Quince

ORANGE. We list only this one Quince, as we consider it by far the best. The trees commence to bear very young and produce big crops. Fruit is excellently flavored and of large size. 2-yr., 85c each; 10 for \$7.00.

Apricot

MOORPARK. Large, roundish oval, pale orange with a faint touch of red on cheek; yellow flesh, ripens first of August. 2-yr., 50c each; 10 for \$4.50.

Grown Fruit Trees For Profit

Peaches

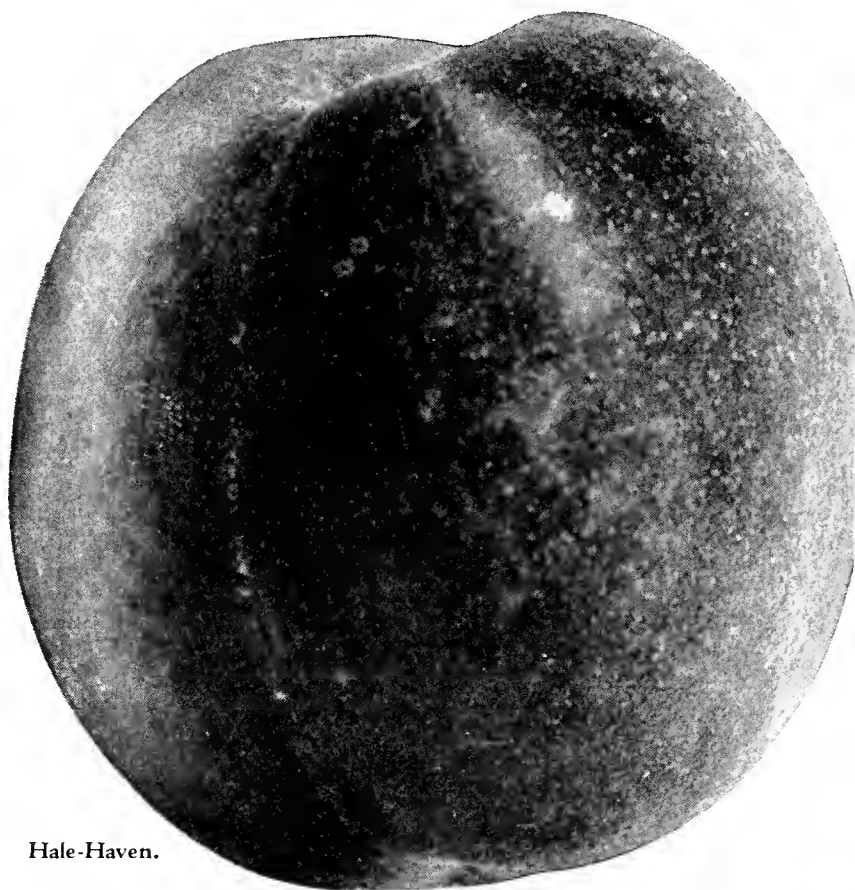

HALE-HAVEN. This Peach was introduced by the South Haven Experiment Station. It is firm and hardy; yellow flesh. Size large as South Haven or a medium Hale. Very productive. 2-yr., 50c each; 10 for \$4.50.

ELBERTA. (Midseason yellow freestone). The leading commercial variety. Fruit is large, firm, juicy, making it ideal for canning, storage and shipping. Beautiful golden yellow color with bright red cheeks. Very hardy, vigorous. A heavy bearer. 2-yr., 35c each; 10 for \$2.75; 100 for \$22.50.

J. H. HALE. (Midseason yellow freestone). Ripens a few days earlier than Elberta. Fruit extra large, golden yellow with deep carmine blush. Excellent quality and flavor. Tree is large, hardy, and bears young. Does best when grown with Elberta. 2-yr., 35c each; 10 for \$2.75; 100 for \$22.50.

ROCHESTER. (Early midseason freestone). Large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone Peaches and highly desirable for canning. Popular in Western New York and Michigan. 2-yr., 35c each; 10 for \$2.75; 100 for \$22.50.

SOUTH HAVEN. (Early). Ripens about three weeks earlier than Elberta; wonderful canner and shipper. Golden yellow in color with a red cheek. South Haven is very popular in all Peach growing sections of the country, returns a handsome profit to the commercial grower. It sells at a premium on account of its earliness in the market. 2-yr., 35c each; 10 for \$2.75; 100 for \$22.50.

Kieffer Pear.

Pears

BARTLETT. The most popular Pear for home use and market, a leader among canning Pears. Should be in every garden and orchard. Large, golden yellow with reddish blush on the sunny side. Flesh tender, melting and juicy, with a delicious, musky flavor. Tree vigorous, erect, bears abundantly. 2-yr., 45c each; 10 for \$3.75; 100 for \$32.50.

KIEFFER. (Fall). Large, handsome appearance, rich golden yellow, sometimes tinted red on the sunny side; bears largest, most consistent bumper crops. Wonderful keeper and an astounding long distance shipper. Tree hardy, very strong grower, bears at an early age, producing phenomenal crops. 2-yr., 45c each; 10 for \$3.75; 100 for \$32.50.

SECKEL. One of the richest and highest flavored Pears known; always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. September and October. 2-yr., 45c each; 10 for \$3.75; 100 for \$32.50.

Yellow Egg Plums.

Plums

YELLOW EGG. Very popular yellow Plum. Rapid grower; hardy, thrifty, prolific bearer. Fruit rich yellow, size medium to large. 2-yr., 45c each; 10 for \$3.75; 100 for \$32.50.

GERMAN PRUNE. The most delicious of all Plums. Extra large size, often two inches in diameter. Early and abundant bearer. Combines hardness, immense size, delicious quality, long keeping, beautiful color, small pit; an early and prolific bearer, often producing a good crop in two years after planting. 2-yr., 45c each; 10 for \$3.75; 100 for \$32.50.

Westhauser's Heavy-Rooted Grape Plants

**RED
WHITE and BLUE
Grape Assortment**
12 Well Rooted \$1.00
One-Year Plants

4 CONCORD. (Blue).
4 NIAGARA. (White).
4 DELAWARE. (Red).

See page 25 for other
collections.

OUR GRAPE PLANTS are known the country over for a fast growing and heavy bearing strain. They will produce delicious fruit, when established, for a lifetime. Many thousands of our customers are reaping both pleasure and profit from their investments.

Concord Is the leading variety for table use, also is supreme for jelly and wine purposes. They will grow on all kinds of soil and produce enormous crops of fruit. The bunches are large and compact, the berries are dark blue and very juicy. Many thousand carloads and truckloads are shipped every fall from the great Michigan Fruit Belt. Grape plants are very scarce the country over this year, it will pay you to order early and have your plants reserved. **For prices, see page 31.**

Niagara (White). This is the leading white Grape grown. Berries are large and fine flavored. Ripens about the same time as Concord. **For prices, see page 31.**

Moore's Early (Black). Ripens about two weeks earlier than the Concord; large berries and bunches. Excellent for home use and market, and does not winter-kill. **For prices, see page 31.**

Agawam The bunches are large, shouldered. The berry is of a reddish brown and very tender, with an excellent flavor. Agawam is very vigorous and productive. It is one of the most outstanding Grapes of its class. **For prices, see page 31.**

Delaware Berries are compactly set, light red, sugary and delicious. A favorite dessert Grape, and among the very best red varieties. **For prices, see page 31.**

Caco (Red). This new Grape is outstanding for its beauty and quality. Color wine-red, flavor unusually rich, rivals in appearance and flavor Grapes grown under glass. Caco was awarded a medal by the American Institute of New York, a high honor for achievement. 2-yr. only, 45c each; 3 for \$1.25; 6 for \$2.25; 12 for \$4.00,

Westhauser Nurseries,
Sawyer, Mich.

Dear Sirs:

I received the 5000 grape plants and they were real nice. Kindly send me your list early next season, as I will need some more. Enclosed find money order for 1000 more grape plants.

Yours very truly,
JOHN ZIMMERMAN.

Prunus Triloba

**The Rose Tree of China
Bush Form.**

One of the most beautiful and showy of flowering trees. Very early in spring, before its leaves appear, the small tree is decked in fleecy cloud of very double light pink blossoms. No lawn is too small for at least one of these trees, as they seldom attain a height of more than 8 feet. A row along the driveway also gives a lovely effect. The roselike blossoms make excellent cut flowers. 18-24 in., 35c each; 3 for \$1.00.

Prunus Triloba.

Prunus Pissardi

(Purple Leaved Plum).

4 to 5 feet. A very remarkable and beautiful tree, with almost black bark, and striking pinkish purple leaves in the spring that deepen in color as the season advances. Has single, white flowers. Very striking and ornamental for lawn planting. 75c each; 3 for \$2.00.

Prunus Pissardi.

3 New Ornamental Berries

Tree Strawberry or Strawberry Raspberry

A very unique ornament as well as fruit bearing plant for the garden. Each year there is a **new top growth**, 15 to 18 inches high, and the fruit is borne in June on the same season's growth. The roots do not have to be transplanted and are good for many years. The fruit is large, cardinal-red, cone shaped. It is the size of a strawberry. **Price: 6 for 60c; 12 for \$1.00.**

Juneberry

Is a tree-bush, grows to 6 feet high and spreads wide at the top, stems are shiny red in the winter, covered with white blooms early in the spring, thus making it a rare ornamental shrub. The blooms are followed by large grape-sized berries, reddish purple. Flavor like blueberry or huckleberry but not as acid. Edible and relished by all. **Price: 75c each; 3 for \$2.00.**

Cultivated Blueberry or Huckleberry

Not only does the cultivated blueberry or huckleberry produce very juicy and delicious fruit in clusters which are very easy to pick, 2 to 3 times as large as the wild blueberry, but they are very ornamental bushes and can be pruned to the desired height. The foliage is long and narrow, deep green turning to pinkish white blooms in the spring. **Price: 85c each; 3 for \$2.25.**

Tree Hydrangea P. G.

Tree form of famous Hydrangea P. G. Large white panicles of flowers turn rose colored in autumn. Height at maturity, 5 feet. Strong, 2 to 3 feet. 60c each; 3 for \$1.50.

Tree Hydrangea.

High Bush Cranberry

(Viburnum opulus). A magnificent shrub, of upright, spreading form, with smooth, light gray branches and broad, oval, 3-lobed, bright green leaves. Produces small, white flowers which are borne in broad, flat clusters surrounded by a ring of large, sterile flowers. These are followed by very showy scarlet berries, which cling to the bush all winter. Grows 8 to 12 feet tall. 18 to 24 inches. 35c each; 3 for \$1.00.

High Bush Cranberry.

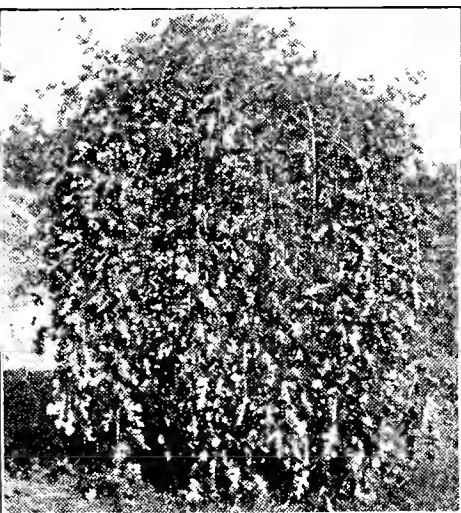

Westhauser's Shade Trees

Chinese Elm.

Poplar.

Weeping Mulberry.

SILVER MAPLE. Rapid growing tree, producing a quick shade, suitable for street and park. The leaves are irregularly indented, bright green above and silver beneath. 3-4 ft. trees, 30c each; 4 for \$1.00. 4-6 ft., 50c each; 3 for \$1.25. 10-12 ft., \$1.25 each; 3 for \$3.00.

WISCONSIN WEEPING WILLOW. Grows rapidly; has long, fine leaves borne on long, sweeping branches that reach the ground. 5-7 ft., 60c each; 3 for \$1.50. 8-12 ft., \$1.00 each; 3 for \$2.50.

BIRCH, CUT-LEAVED. Tall, slender, graceful white-barked tree with drooping leaves. Presents a very attractive appearance in a single tree. 3-4 ft., \$1.00 each; 3 for \$2.50. 5-6 ft., \$1.50 each; 3 for \$4.00.

CHINESE ELM. Rapid grower, well rounded head; grows to a tall, spreading tree. Almost any soil suitable. 3-4 ft., 25c each; 10 for \$2.00. 5-6 ft., 50c each; 3 for \$1.25. Fifteen 18-20 in. seedlings for \$1.00.

TEAS' WEEPING MULBERRY. Most graceful hardy weeping tree in existence. Forms an umbrella-shaped head with slender branches drooping to the ground. Eatable fruit. Extra heavy specimens, 4-6 ft., \$1.60 each.

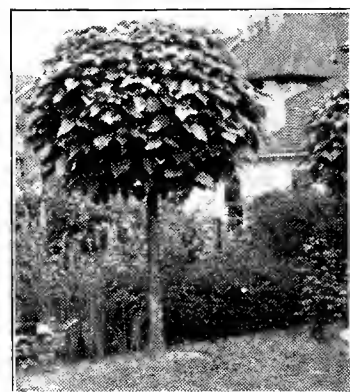

CUT-LEAF SUMAC. Small tree, if pruned induces considerable bottom growth. White flowers are borne during June and July followed with red fruits. In fall leaves turn to a beautiful, brilliant red. 3-4 ft., 50c each; 3 for \$1.25.

CATALPA BUNGEI. Beautiful round umbrella head, formed without pruning. Large, heart-shaped leaves which are deep green. 5-7 ft., extra heavy, strong trees with 2-yr. heads, \$1.00 each; 3 for \$2.75.

LOMBARDY POPLAR. Tall and slender tree with bright green leaves and silvery appearance on under side. Suitable for planting along drives and boundary lines; also used for windbreaks and tall screen hedges. 2-3 ft., 25c each; 6 for \$1.25. 5-7 ft., 50c each; 6 for \$2.75.

Cut-Leaf Sumac.

Catalpa Bungei.

Westhauser's Hardy Evergreens

GLOBE ARBOR-VITAE. Perfectly globe-shaped, dense growth, deep green foliage. Popular for foundation and rock garden planting. 8-12 in., 50c each; 3 for \$1.25.

PYRAMIDAL ARBOR-VITAE. Excellent pyramidal evergreen. Height 15 feet, width not more than 2 to 2½ feet at base. Tapers to a graceful, slender, pyramidal shape. Foliage dark green. 15-18 in., 60c each.

Mugho Pine.

SCOTCH PINE. Foliage dark green. Rapid grower, dense and picturesque in form. Favorite for single or group planting. 2½-3 ft., balled and burlapped, \$1.75.

NORWAY SPRUCE. Deep green foliage, excellent for windbreaks, an ideal Christmas tree. Fast grower. 15-20 in., 35c each; 3 for \$1.00; 6 for \$1.75. 2-3 ft., balled and burlapped, \$1.25 each; 3 for \$3.25.

NORWAY PINE (Red Pine). Broad, pyramidal-shaped evergreen with dark green foliage. Very ornamental, hardy and vigorous grower. 2-2½ ft., balled and burlapped, \$1.50 each.

COLORADO BLUE SPRUCE. Its intense steel-blue, glistening foliage makes it desirable for lawn or grouping. Three times transplanted. 12-15 in., \$1.00 each; 3 for \$2.75.

BLACK HILLS SPRUCE. The hardiest of all Spruce. Bushy in habit, and symmetrical. Foliage varies from a bright green to blue tint. Slow grower, often seen in foundation plantings. Balled and burlapped, 15-20 in., \$2.50 each; 20-24 in., \$3.25 each.

MUGHO PINE. True dwarf type with dense growth. Grows only to about 4½ to 5 feet height but spreads out to 6 or 8 feet in diameter. Color is a deep rich green throughout the year. 8-12 in. spread, 75c each; 3 for \$2.00.

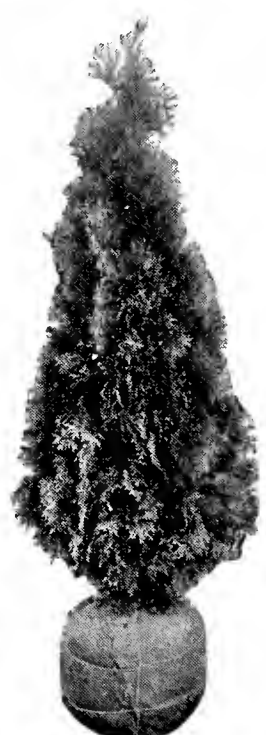

PFITZER'S JUNIPER. Low, horizontal growing evergreen with bluish tint, foliage fine in texture. They are very graceful and particularly useful for foundation planting, in rock garden and in front of taller evergreens. 10-15 in., 60c each; 3 for \$1.50.

IRISH JUNIPER. An erect, slender, compact evergreen, 1½ feet in diameter. Used in cemetery plantings and landscaping. 12-15 in., 60c each; 15-20 in., 80c each, balled and burlapped.

GOLDEN ARBOR-VITAE. A very hardy evergreen, bushy; grows up to 4 feet in height. Foliage is light green with a tinge of gold. This variety is becoming very popular. 20-24 in., \$1.00 each; 3 for \$2.75.

Irish Juniper.

Pyramidal Arbor-Vitae.

Black Hills Spruce.

Pfitzer's Juniper.

Westhauser's Hardy Flowering Shrubs

Mock Orange (Philadelphus, Virginal). Strong growing. Grows 8 to 10 feet high. Clusters of extremely fragrant, double flowers in June, continuing intermittently until fall. The finest Mock Orange. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00. 2-3 ft., 40c each; 3 for \$1.10; 12 for \$4.00.

Coralberry (Or Red Snowberry). Medium size shrub, with small pink flowers in the spring and followed by red berries all along the stems, that remain all winter. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00.

Spirea Van Houttei (Bridal Wreath). Long, graceful drooping sprays covered with a mass of white flowers, blooming in early spring. Very hardy. Much used in all sorts of landscape work. Grows to a height of 6 feet. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00. 3-4 ft., 50c each; 3 for \$1.25; 12 for \$4.50.

Lilac, Persian Purple A decided improvement over the common Lilac. A shrub with slender, arching branches, attaining a height of 5 to 10 feet. The foliage is small, the flowers bright purple. Blooms in May and June. A much more profuse bloomer than the common, and does not sprout so much from the roots. We consider the Persian much preferable for flowers. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00.

Honeysuckle, Tartarian The finest and best known of the bush Honeysuckles. Has somewhat spreading branches, and bright green foliage. The flowers are of bright pink color, followed by red berries which ripen in midsummer and cling to the bush for several weeks. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00. 2-3 ft., 40c each; 3 for \$1.10; 12 for \$4.00.

Spirea Anthony Waterer Bright crimson flowers blooming at the end of June, and if flowers are removed when they fade will bloom until frost. Dwarf grower, not over 2½ feet high at maturity. 8-12 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00.

DESCRIPTIONS OF THESE SHRUBS ON PAGES 27 AND 29.

Westhauser's Hardy Flowering Shrubs

Japanese Barberry (Berberis Thunbergii). As an ornamental shrub it cannot be surpassed. Foliage very luxuriant and berries decorative throughout the winter. As an ornamental hedge, either trimmed or untrimmed, it has no superior. Its prickly branches make the hedge impassable for man or animals. This variety is not affected by wheat rust. 18-24 in., 30c each; 3 for 55c; 12 for \$2.00.

Red-Leaf Barberry (Atropurpurea). A brilliant accent shrub as solitary specimen or in a close group amidst duller foliage. An exact reproduction of Thunbergii in every respect except color; this variety starting off in its first foliage a warm bronzy red; the heat of summer intensifying its red brilliancy; autumn adding other tints to its richness. The abundant scarlet berries persist throughout the winter along the dense network of spiny twigs. A sunny exposure is necessary for color. 18-24 in., 35c each; 3 for 65c; 12 for \$2.55.

Snowberry A popular, graceful shrub of medium height, having small pink flowers in spring. Large, snow-white berries in fall which hang on nearly all winter. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00.

Tamarix Africana Graceful shrubs with feathery foliage and large panicles of showy flowers. Relatively hardy. A moist, sandy or loamy soil is well adapted to them. Splendid for seaside planting or other damp places. Are particularly attractive in combination with other shrubs, adding interest by contrast with ordinary foliage. 2-3 ft., 30c each; 3 for 85c; 12 for \$3.00. 3-4 ft., 40c each; 3 for \$1.10; 12 for \$4.00.

Weigela Rosea This is a very vigorous grower with spreading, bushy habit, and is covered with fine, rose colored flowers in May and June. The flowers are large, showy and somewhat bell-shaped; leaves quite large and dark green. Very popular. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 2-3 ft., 40c each; 3 for \$1.10; 12 for \$4.00.

Flowering Almond Covered with small, roselike pink flowers before the leaves come in the spring. Blooms very early. Attains a height of 6 to 8 feet. 12-18 in., 25c each; 3 for 65c; 12 for \$2.50. 18-24 in., 35c each; 3 for \$1.00; 12 for \$3.00.

Flowering Quince Bright scarlet flowers in May. Medium large bush. Fine for specimens, shrub masses or may be pruned for hedging purposes. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00.

Forsythia Golden yellow, bell-shaped flowers which appear very early in the spring before the leaves come out. One of the very first shrubs to bloom. Grows 6 to 8 feet high. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 2-3 ft., 40c each; 3 for \$1.10.

Hydrangea A. G. Large, snowball-like clusters of flowers lasting from June to late August. Shrubs attain about 4 feet in height. Very handsome appearance. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00.

Hydrangea P. G. Blooms from July to September. Starts with a white bloom which turns to pink; large bushes and showy. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00.

Snowball Well known; flowers grow in large, ball-like clusters, snow-white; blooms early. 12-18 in., 20c each; 3 for 55c; 12 for \$2.00. 18-24 in., 30c each; 3 for 85c; 12 for \$3.00. 2-3 ft., 40c each; 3 for \$1.10; 12 for \$4.00.

Hedge Plants

AMoor River Privet. The hardiest of Privets. For hedges, plant one foot apart. 18-24 in., 10c each; 12 for 75c; 100 for \$6.00. 2-3 ft., 20c each; 3 for 55c; 12 for \$2.00; 100 for \$9.00.

CALIFORNIA PRIVET. This variety has long been known as one of the most beautiful hedging plants. It grows rapidly and is free from insects and scale. Leaves are dark, glossy green. Not dependably hardy in some northern sections. 18-24 in., 10c each; 12 for 75c; 100 for \$6.00. 2-3 ft., 20c each; 3 for 55c; 12 for \$2.00; 100 for \$9.00.

WESTHAUSER'S PRICE LIST

WESTHAUSER'S PRICES are fair and are governed by the amount of plants we have to sell. In spite of adverse growing conditions last summer, we have again succeeded in obtaining a wonderful stand of nursery stock. Our Strawberry plants were grown on NEW LAND, are hardy, extra heavy rooted, 100% healthy and full of pep; they are really in a class by themselves for QUALITY. There is no object in buying ordinary, haphazardly grown nursery stock when you can buy WESTHAUSER'S QUALITY at such reasonable prices. Give us a trial this year. We guarantee satisfaction.

DISCOUNT FOR EARLY ORDERS

10 % for orders received up to February 1, 1935.

5 % for orders received up to March 1, 1935.

No discount on orders received after March 1, 1935.

To secure discount full cash must accompany order.
For Larger Quantities Let Us Quote You Special Prices
